I am a final year student in Information technology at the North-West university VandeBijlpark, I love what I do so much and pride myself in that I am a motivated quick learner of new things and I do not simply give up on things before I figure them out. After this year I would like to be involved in an internship/graduate program to experience the real world and get the opportunity to apply my skills and also acquire new skills and experiences.

Skills

- Team building
- Regulatory Compliance
